Experience

Founder/Full-Stack Engineer

The Dot Devs, LLC

August 2020 – Present

Remote, USA

- Founder and engineer at a small remotely US-based Web Development outfit.
- Responsible for sourcing and negotiating with clientele along with project management to meet milestone goals.
- Engineered web applications using a variety of technologies such as MERN-based stack, web sockets, REST APIs.
- Architecting relational and non-relational DBs like MongoDB and MySQL for the storage of messaging and media.

IT Operations Administrator II

San Francisco Department of Public Health

February 2019 – November 2019

San Francisco, CA

- Member of SF DPH IT Epic team for medical record platform roll-out and multi-departmental migration.
- Tasked with the management and deployment of end-user infrastructure to ensure devices met Epic compliance.
- Troubleshooted and documented a myriad of technical equipment ranging from desktops to medical label printers.
- Responsible for the communication and cooperation with multiple departments across multiple project sites.

Programmer Analyst Tier 2/ IT Field Services

UCSF & Zuckerberg General Hospital / Zero Chaos

June 2015 – August 2016

San Francisco, CA

- Member of the UCSF IT Rebuild team for Zuckerberg San Francisco General Hospital, deploying over 3,000 PCs.
- Tasked with collecting data and troubleshooting large scale Android based IPTV systems.
- Led a small team in daily scrum to carry out assignments and complete tasks in an efficient and satisfactory manner.
- Provided support for the UCSF and DPH end users and their computers/associated medical technologies.
- Wrote, edited, and formatted official hospital reference documentation.
